November 16th 2010

## **tick Trading Software (tick-TS) adds FX trading for ABN AMRO Clearing Bank customers via Currenex platform**

As of 1<sup>st</sup> November 2010, ABN AMRO Clearing Bank customers can access Forex markets via tick-TS' own multi-asset platform, TradeBase MX, due to the recent connection of the Currenex platform. "For us", said Oliver Wagner, CEO of tick Trading Software, "the implementation is the next logical step in our effort to extend tick-TS' market coverage and to provide our customers with the best trading platform worldwide."

In addition to the superior frontend features offered by TradeBase MX, ABN AMRO Clearing Bank customers can also make use of the TBMX application programming interface (API).

"This makes TradeBase MX an excellent integrated tool for our high frequency clients to access our internalised, low latency liquidity pool from this multi-asset platform", said Andrew Gibson, Sales Manager-FX Products at ABN AMRO Clearing Bank.

"The fact that ABN AMRO Clearing Bank supports FX execution and clearing, both for hedging and speculative purposes, makes this setup an ideal supplement for our customers", said Teodora Georgieva, Key Account Manager at tick-TS. "This is especially important in conjunction with TBMX's Auto Hedging functionality."

The implementation of FX trading is the latest amplification of the co-operation between tick Trading Software and ABN AMRO Clearing Bank. Eurex and the NYSE Euronext Cash Market were previously integrated in July 2010.

### *tick Trading Software AG*

*The company was founded in 2002 by CEO Oliver Wagner and entrepreneurs from the financial industry. With its expert team of software engineers, tick-TS AG is dedicated to delivering the most advanced package for professional trading of all asset classes, worldwide.*
